

GreenTech Solutions - Employee Guide

This is a simple sample document created for testing a PDF RAG application. It contains clear facts so you can check whether PDF reading, chunking, retrieval, and question answering are working correctly.

About the Company

GreenTech Solutions was founded in 2020. The company is based in Beirut, Lebanon, and builds software tools for energy monitoring and sustainability reporting. Its main customers are small and medium-sized businesses that want to understand their electricity use and reduce waste. The company currently has around 45 employees.

Working Hours

Normal working hours are Monday to Friday from 9:00 AM to 5:00 PM. Employees have a one-hour lunch break. The company allows flexible arrival between 8:30 AM and 9:30 AM as long as employees complete their required working hours and attend scheduled meetings.

Remote Work Policy

Employees may work remotely up to two days per week. The remaining working days are normally spent in the Beirut office. Remote days should be coordinated with the employee's manager so that team meetings and important in-person work are not affected.

Annual Leave

Each full-time employee receives 20 paid vacation days per year. Vacation requests should normally be submitted at least one week before the planned leave date. Longer vacations may require earlier notice so the team can organize project coverage.

Sick Leave

Employees can take sick leave when they are unable to work because of illness. If the absence continues for more than two working days, the company may ask for a medical note. Employees should inform their manager as early as possible when they need sick leave.

Learning and Training

Every employee has a yearly training budget of 500 US dollars. The budget can be used for approved online courses, technical certifications, workshops, or professional books. Employees should receive manager approval before making a training purchase.

IT and Security

Company passwords must never be shared with other people. Employees should use strong passwords and enable multi-factor authentication whenever it is available. Confidential company files should only be stored in approved company systems.

Support Contacts

For technical problems, employees can contact the IT team at support@greentech.example. For questions about leave, contracts, or company policies, employees can contact the HR team at hr@greentech.example. Urgent security incidents should be reported immediately to the IT team.
